Power Source + UART CMD Interface

CAP Bank +USB PWR OFF INT

Interface for ZigBee at DB

Brd2brd Interface

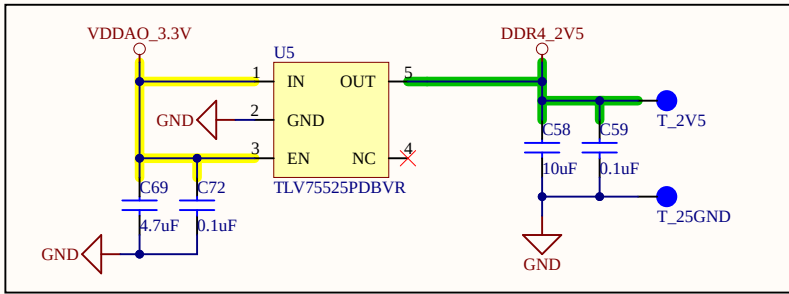

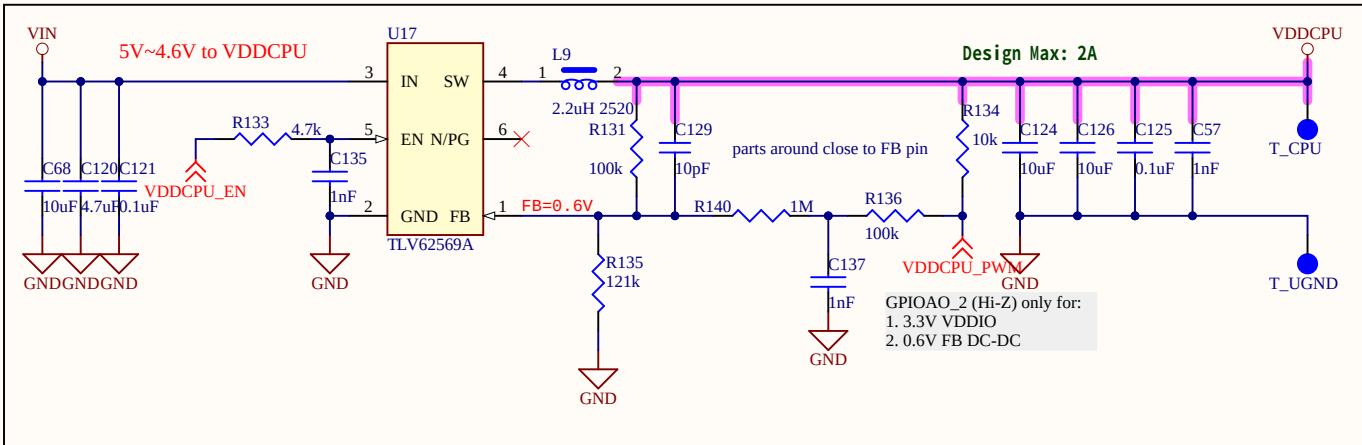

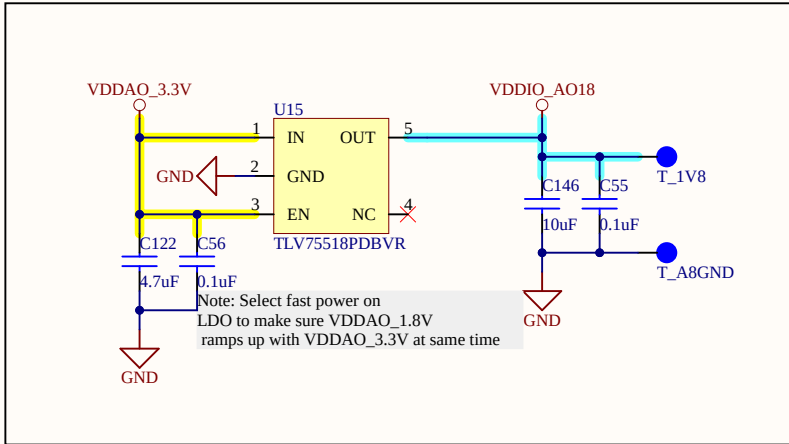

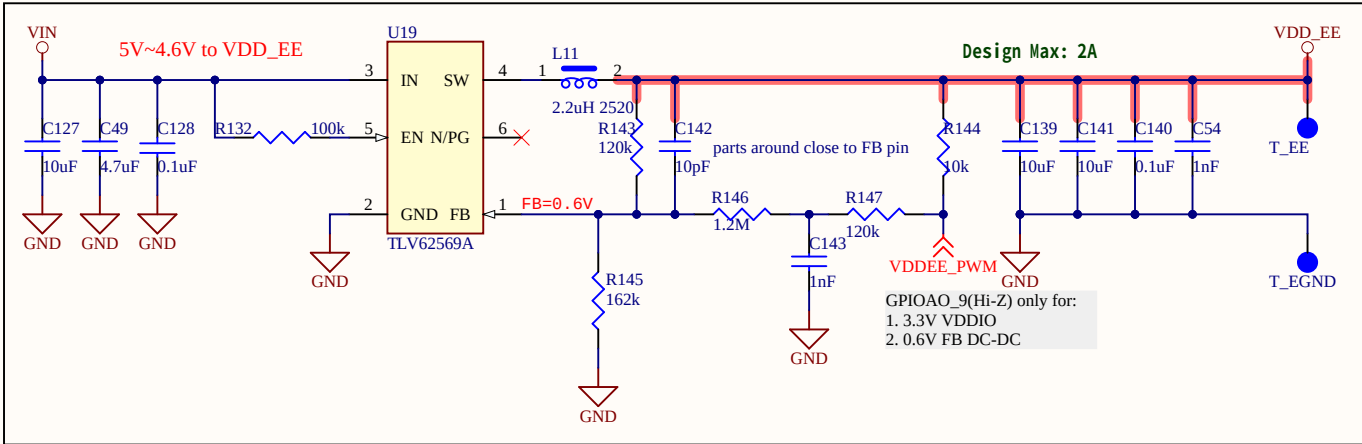

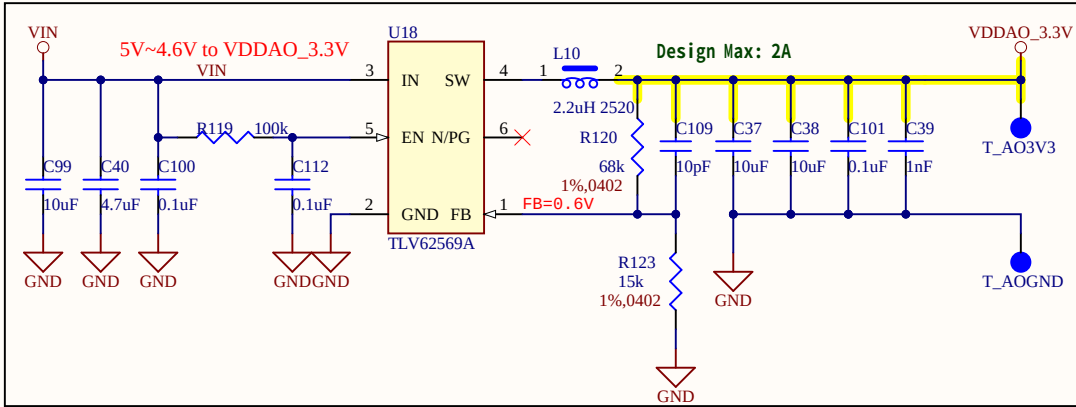

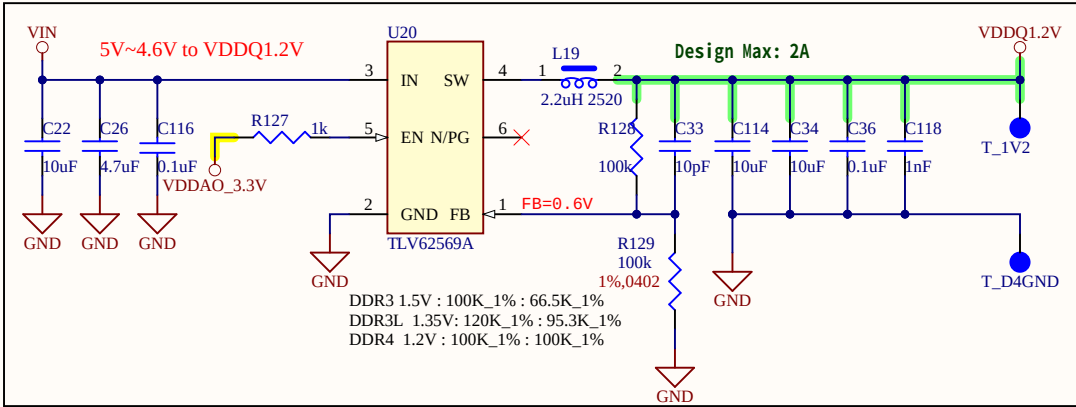

Interface for Thread at DB

Flash program: pull down nand D5 at pin hole before PWR on, SoC will be forced into Uboot/programable mode no matter USB_ID is under Host or Device mode based on FW prattice.

such Hub is USB host by default (USB_ID pulled down by R52), so it can handle ext USB device.
